

2020 WINDOM AREA GARDEN TOUR

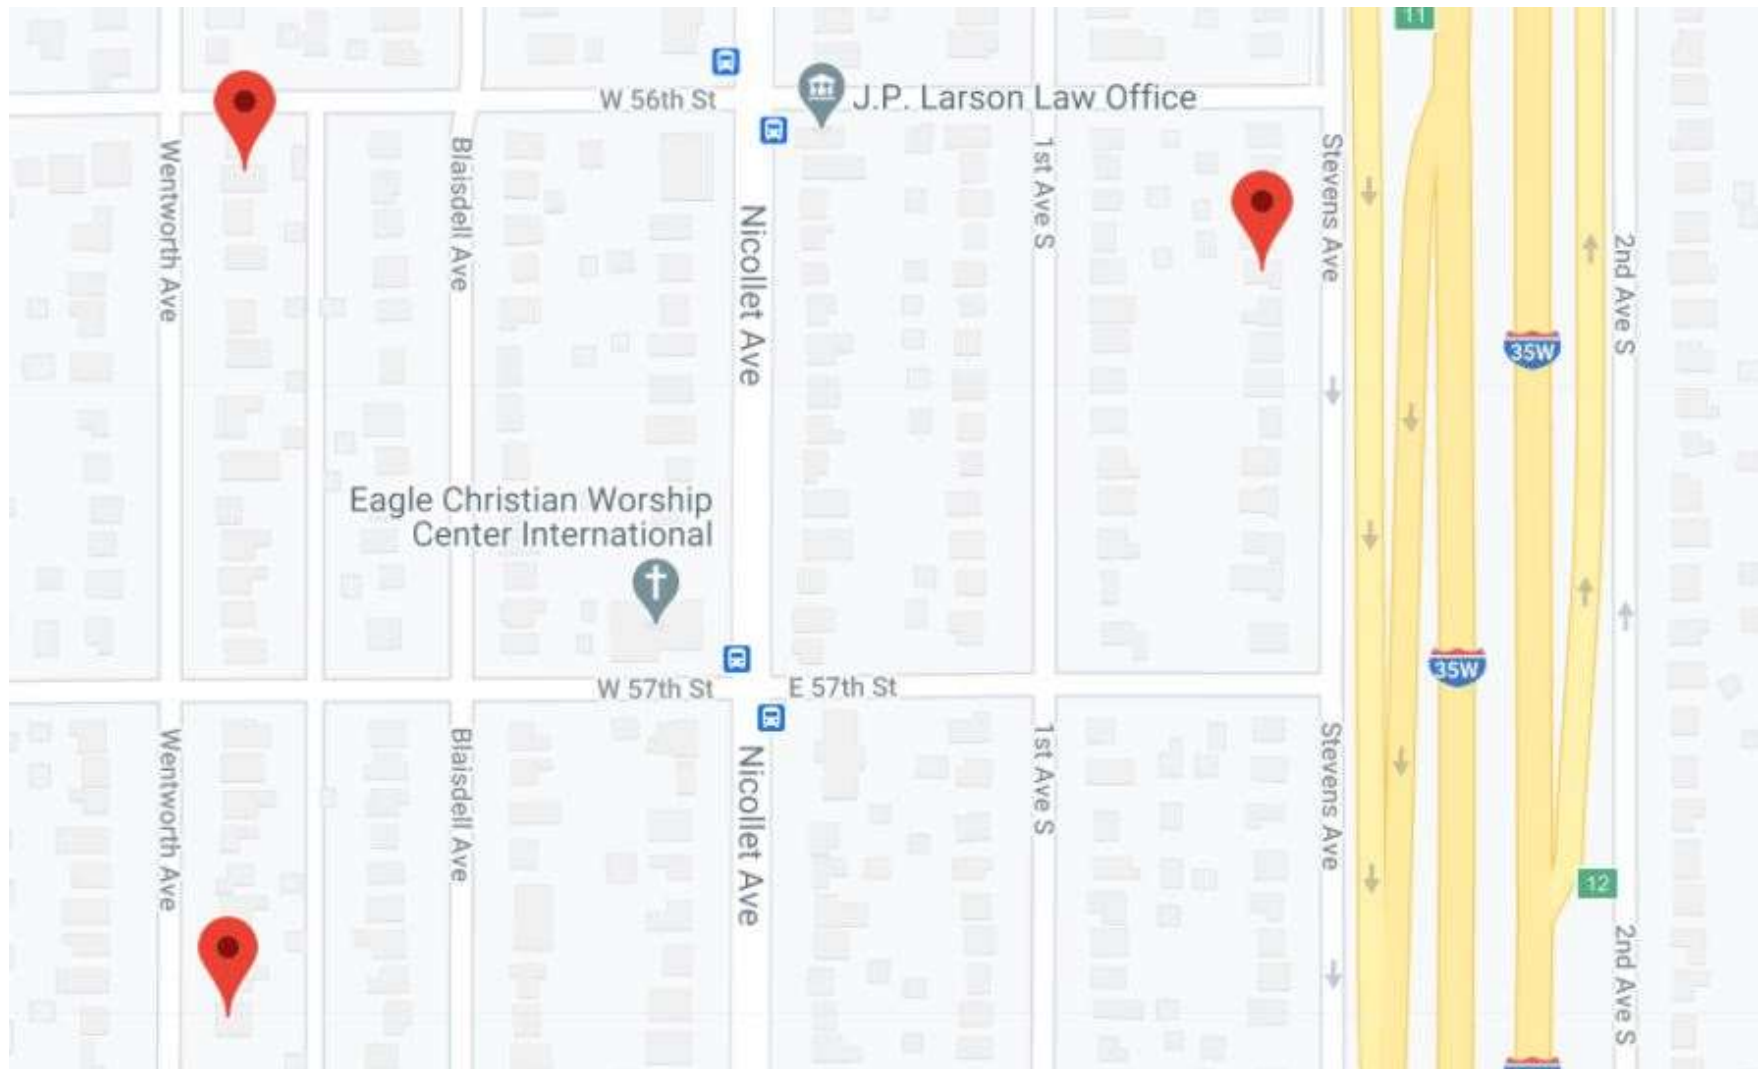

GARDEN ADDRESS	GARDEN DESCRIPTION
5701 Garfield Av S	Boulevards and alley are hardy perennial flowers. The crowded gardening style aims to have something blooming from March through October. A shady section on the north is a mix of beautiful ground cover. Front yard: three plots of veggies and one of raspberries. Plus a little turf. I always have perennials to give away. 100% organic for nearly 30 years.
5404 Wentworth Ave	Native garden in portion of the front yard started last year as part of a plan to replace all front yard turf with plants native to MN.
5308 1st Ave S	Boulevard garden, pollinator garden, gardening on a hill
106 E Diamond Lake Rd	Pollinator and native plants garden is located on the westside of Mayflower Church by the apartment building.
5545 Emerson Ave S	Accessible. Many pollinators. Vegetables, flowers, fruit. Clover-overseeded (very small) lawn. Rainwater garden. Center rainwater strip on driveway. Main gardens are in the back yard...enter up the driveway.
5740 Blaisdell Ave	All very much in progress! Front hill - mostly native perennials, very pollinator friendly. Many started from seed via winter sowing. Lots of splits from neighbors. Takes longer but much more affordable! Boulevard - started in 2020 with a pollinator boulevard kit from Wild Ones/Prairie Restoration. Plan is to expand the garden to include the whole boulevard. Veggies towards the back of the front yard by the fence.
4624 Clinton Ave	We had a rain garden installed in our front yard. It is just a month old so plants, which were transplanted from our back yard and a friend's garden, are still getting established but the design helped with drainage issues we were having.
2607 W 55th Street	Most of this yard is under cultivation, combining native plants with favorite nursery hybrids. The yard includes a pollinator-friendly garden, a rain garden, a vegetable garden, blueberry & raspberry beds, a white garden and a scent garden.
5616 Stevens Ave	A "magic" garden started in 2010, and focuses on prairie natives
5706 Blaisdell Ave	A "back to nature" pollinator garden started 20 years ago
5444 Blaisdell	An urban farm garden started 15 years ago
5605 Wentworth	Pollinator garden started 20 years ago
5733 Wentworth	A "free form" garden started 30 years ago
5413 Pleasant	A native garden started 4 years ago
